Global Pharma Networks and Sparta Systems Inc. have signed a strategic partnership agreement whereby both companies will support each others' clients in the pharmaceutical, biotech, medical device, and healthcare industries for the implementation of quality management solutions. GPN will provide business process re-engineering and validation support to clients requiring quality management solutions while Sparta Systems will provide their Trackwise[®] application to automate such solutions.

Both companies bring their common strengths together to offer potential clients in UK and Ireland a complete business solution that will provide world-class quality solutions to meet the competitive needs of these industries in Europe.

Global Pharma Networks is a consulting services company with over 80 years experience working directly in the health Industries. GPN brings together real **Subject Matter Experts** (SMEs) in their fields of expertise, people who have held these positions within Industry directly and make them available to our clients so that they can leverage business improvements off our collective knowledge and expertise. Within the the area of quality management solutions GPN brings together it's skills and knowledge of compliance, lean operations, value stream mapping and process and computer system validation to help clients develop effective value adding quality management solutions

Sparta Systems, Inc., the makers of TrackWise, is the recognized worldwide leader in providing **quality management software** (QMS) providing off-the-shelf configurable solutions for all cGxP compliance needs. With over 90 customers, hundreds of sites and over 150,000 end-users, TrackWise has been successfully implemented for CAPA, Complaints, Change Control, Audit Management, EH&S, Sarbanes-Oxley, and much more. TrackWise is **100% 21 CFR Part 11 Compliant** and offers a fully Web based, zero-footprint solution.

Both Global Pharma Networks and Sparta Systems count leading life science companies in their client lists.
